

Volume 9, Number 1 (2016)

ISSN 1754-646X

Contents

- 1 Kathryn Walls
The After-Lives of Vain Women in *The Rape of the Lock*: Pope's Sylphs and the "Corpuscular Philosophy" of Robert Boyle
- 16 John Holmes
Algernon Swinburne, Anthropologist
- 40 Matthew Rowney
A Fearful Symmetry: Borges and the Geometric Language of the Brain

Article Reviews

- 58 Melissa Bailes
Review of Anne M. Thell's "[A]s lightly as two thoughts': Motion, Materialism, and Cavendish's *Blazing World*."
- 60 Michelle Phillips Buchberger
Review of Naomi Rokotnitz's "Passionate Reciprocity': Love, Existentialism, and Bodily Knowledge in *The French Lieutenant's Woman*."
- 62 Richard Moss
Review of David Letzler's "Cross-Up Disciplinarity: What Norbert Wiener, Thomas Pynchon, and William Gaddis Got Wrong about Entropy and Literature."
- 64 Joanna Taylor
Review of Laura Forsberg's "Nature's Invisibilia: The Victorian Microscope and the Miniature Fairy."

66

David Thorley

Review of Ian Lawson's "Bears in Eden, or, This Is Not the Garden You're Looking for: Margaret Cavendish, Robert Hooke and the Limits of Natural Philosophy."

About the JLS

The *Journal of Literature and Science (JLS)* is a peer-reviewed academic journal published twice annually in Summer and Winter. The JLS was founded in 2007, and produced its first issue at the beginning of 2008. It was originally hosted by the University of Glamorgan's Research Centre for Literature, Arts and Science (2007-12), before moving to its own independent online site in March 2013, with the support of the University of Westminster. The journal's first, and present, editor is Professor Martin Willis, Professor of English at Cardiff University. The Advisory Board includes leading scholars of literature and science from around the world. The JLS is published in digital format, is entirely open access, and requires no subscription fee.

The journal is dedicated to the publication of academic essays on the subject of literature and science, broadly defined. Essays on the major forms of literary and artistic endeavour are welcome (the novel, short fiction, poetry, drama, periodical literature, visual art, sculpture, radio, film and television). The journal encourages submissions from all periods of literary and artistic history since the Scientific Revolution; from the Renaissance to the present day. The journal also encourages a broad definition of 'science': encapsulating both the history and philosophy of science and those sciences regarded as either mainstream or marginal within their own, or our, historical moment. However, the journal does not generally publish work on the social sciences. Within these confines, essays submitted to the journal may focus on the literary and scientific productions of any nation or group.

All essays should be interdisciplinary in focus, offering an original view of both the literary or artistic subject matter and the science or sciences under consideration. While essays on individual examples of literary and artistic production are welcomed, these should also seek to show the wider significance of their analyses and interpretations. The journal does not publish essays focused exclusively on literature or art, or exclusively on the history and philosophy of science.

Submission and Citation Information

Abstracts and articles for submission should be sent to the Editor, Professor Martin Willis, by email only: WillisM8@cardiff.ac.uk

The *JLS* recommends that an initial email inquiry, including an abstract of the proposed article, should be sent in advance of completed articles in order to ensure that the subject matter is suitable for publication under the *JLS*'s remit.

All articles should be from 6000-9000 words in length, interdisciplinary in focus, and offering an original view of both the literary or artistic subject matter and the science or sciences under consideration. While articles on individual examples of literary and artistic production are welcomed, these should also seek to show the wider significance of their analyses and interpretations. The journal does not publish essays focused exclusively on literature or art, or exclusively on the history and philosophy of science.

All submitted articles should be presented in MLA Style, with notes kept to a minimum. *JLS* articles do not use personal pronouns (e.g. "In this article I will..." is not appropriate, while "This article will..." is appropriate). All spellings should follow British English. All submitted articles should include a short abstract (150 words maximum) below the title and author's name and ahead of the opening sentence.

The *JLS* aims to complete the first stage of peer review (consideration of articles by the editor and advisory board) within 4 weeks of submission and the second stage of peer review (external, blind, double peer-review) within 8 weeks of the completion of the first stage. All authors whose articles reach the second stage of peer review should expect to have a decision on publication within approximately 12 weeks of the date of their original submission of an article

Citing the JLS: the journal's full title is the *Journal of Literature and Science*, and its first issue was Volume 1, Number 1 (2007). All page numbers to individual essays can be found when accessing the PDF file of that essay. The journal's ISSN is 1754-646X. Citations should give Author, 'Title,' *Journal of Literature and Science* Vol, No. (Year): pp., organized according to the specific style guide being used.

The *Journal of Literature and Science* is committed to real and immediate open access for academic work. All of the *JLS*'s articles and reviews are free to access immediately from the date of publication. There are no author charges (commonly known as APCs) prior to publication, and no charge for any reader to download articles and reviews for their own scholarly use. The *JLS* does not, therefore, operate either a Gold or Green model of open access, but is free to all at any time and in perpetuity. To facilitate this the *JLS* depends upon the financial underwriting provided by the University of Westminster's Department of English, the goodwill of its editorial team and advisory board, and the continuing support of its network of peer reviewers.

The *Journal of Literature and Science* also operates under the [Creative Commons Licence CC-BY-NC-ND](#). This allows for the reproduction of articles, free of charge, for non-commercial use only and with the appropriate citation information. All authors publishing with the *JLS* accept these as the terms of publication. Please note that copyright of the content of all articles and reviews remains with the designated author of the article or review. Copyright of the layout and design of *JLS* articles and reviews remains with the *Journal of Literature and Science* and cannot be used in other publications.

The *JLS* is a member of PILA (Publishers International Linking Association) and submits all articles and reviews, including all works that these cite, to CrossRef for cross-referral. To find *JLS* articles and reviews via their DOI numbers, use the URL [http://dx.doi.org/\[DOI number\]](http://dx.doi.org/[DOI number])

Reviews

The *JLS* reviews articles on literature and science, or relevant articles in cognate fields such as the history of science, cultural studies or sociology, published in academic journals within the last twelve to eighteen months. Reviews are generally commissioned by the Reviews Editor, but potential contributors are encouraged to contact the Reviews Editor to suggest articles for review.

The *JLS* does not, at any time, review books or collections of essays. The editors take the view that books within the field are already well covered by reviewing journals while journal articles, often the publication type that offers the most recent scholarship, are never considered in review processes. By doing so, the *JLS* hopes to offer its readers access to academic dialogue on the most recent advances in literature and science.

Reviews should be approximately 750 words in length, should follow MLA Style (notes generally not allowed), and should aim to describe the content of the article under review as well as offer an analysis of its strengths and weaknesses and conclude by assessing its significance for literature and science scholarship.

Proposals for review and completed reviews should be sent to the Reviews Editor, Dr Michelle Geric by email only: m.geric@westminster.ac.uk

Editorial Board

Editor: Martin Willis

Reviews Editor: Michelle Geric

Editorial Assistant: Rebecca Spear

Advisory Board: Tim Armstrong, Gowan Dawson, Folkert Degenring, John Holmes, Lisa Hopkins, William Hughes, Kelly Hurley, Meegan Kennedy, Leah Knight, Sharon Ruston, Eleanor Sandry, Jonathan Sawday, Carol A. Senf, Andrew Smith, Laurence Talairach-Vielmas, Jeff Wallace, Alexandra Warwick and Catherine Wynne.

Melissa Bailes is an Assistant Professor of English at Tulane University, specializing in British literature of the long eighteenth century, the history of science, transatlantic and transnational studies, and women's writing.

Michelle Phillips Buchberger is Assistant Professor in Integrative Studies at Miami University, and holds a PhD in English Literature from Brunel University, England. She teaches both Integrative Studies and English at Miami, and her research areas include Post World War Two British Literature (specifically the work of John Fowles), Interdisciplinary Studies, and creativity. She is particularly interested in adaptations of Fowles' work and in his collaborations with directors, including David Tringham.

John Holmes is Professor of Victorian Literature and Culture at the University of Birmingham. He was Chair of the British Society for Literature and Science from 2012 to 2015 and is now Secretary to the Commission on Science and Literature. His books include *Darwin's Bards: British and American Poetry in the Age of Evolution* (Edinburgh UP, 2009) and the edited collection *Science in Modern Poetry: New Directions* (Liverpool UP, 2012). He is currently completing a monograph on the Pre-Raphaelites and science, and co-editing a research companion to nineteenth-century British literature and science with Sharon Ruston.

Richard Moss is a tutor at Durham University where he teaches drama and American Fiction. His doctoral thesis was entitled "Towards a Preterite Theology: Resistance and Spirituality in the Works of Thomas Pynchon," and explores how a postsecular reading of Thomas Pynchon allows for an intersection between acts of political resistance and modes of religious thought. His academic interests still very much lie with Pynchon's works, but he also works with postmodern American literature, postmodern approaches to religion, and early fantasy and science fiction writers.

Matthew Rowney is Assistant Professor of English at the University of North Carolina at Charlotte. His work on British Romantic literature appears in the *European Romantic Review* and in the inaugural edition of the *Journal of Interdisciplinary Voice Studies*. He is currently working on a book project that examines the ecohistorical and economic architecture of Romantic representations of the natural world.

Joanna Taylor is the Research Associate on the Leverhulme-funded project "Geospatial Innovations in the Digital Humanities" at Lancaster University. She completed her PhD, titled "Writing Spaces: The Coleridge Family's Agoraphobic Poetics, 1796-1898," at Keele University in December 2015.

David Thorley is an independent scholar with research interests in intersections between science and literature in the seventeenth century, early modern ideas about language, and manuscript culture/book history. He is the author of *Writing Illness and Identity in Seventeenth-Century Britain* (Palgrave, 2016).

Kathryn Walls is Professor of English Literature at the Victoria University of Wellington. Author of *God's Only Daughter: Spenser's Una as the Invisible Church* (Manchester Spenser, 2013), and editor (with Marguerite Stobo) of William Baspoole's *The Pilgrime* (Renaissance English Text Society, 2008), she has published across the

spectrum of English literature from Chaucer to Stoppard. She is currently working on the impact of the so-called “Scientific Revolution” on the metaphorical dimension of the poetry of Alexander Pope.
